| Licenses | Registered Psychologist, Admission Number 861111110 Visa holder clinical psychologist, visa number 263884 |

SUMMARY

I am research coordinator Psychology and technology at Thomas More University of Applied Sciences, a research fellow at KU Leuven and a visiting scholar at Queens' University Belfast. As a clinical psychologist, I primarily conduct research in mental healthcare, where I focus primarily on the added value of technology.

EDUCATION

University of Leuven

| | |
|-------------|---|
| 2009 – 2013 | Doctor of Philosophy in Psychology <ul style="list-style-type: none">- PhD Topic: A psychoeducational approach to stress management. An implementation and effectiveness study.- Supervisor: em. Prof. dr. Omer Van den Bergh- Co-supervisors: Prof. dr. Dirk Hermans & Prof. dr. Chantal Van Audenhove |
| 2006 – 2009 | Qualified teacher in Psychology |
| 2004 – 2009 | Master of Science, Clinical and Health Psychology Specialization in health psychology aimed at children and adolescents <ul style="list-style-type: none">- Master thesis topic: An RCT of a 'stress control' intervention in students- Supervisor: Prof. dr. Dirk Hermans |

RESEARCH EXPERIENCE

Queen's University Belfast

Visiting scholar, School of Social Sciences, Education and Social Work

- Centre member, Centre for Technological Innovation, Mental Health and Education (september 2023 – heden)
- Onderzoekspartner, Immersive Technologies and Digital Mental Health Network (september 2020 – augustus 2023)

KU Leuven

Research fellow, Centre for the Psychology of Learning and Experimental Psychopathology (February 2020 – present)

- Various ad hoc projects, amongst other concerning virtual reality for the treatment of specific phobia.

Research fellow, Research Group on Health Psychology (January 2015 – January 2020)

- Various ad hoc projects ranging from the role of autobiographical memory in depression, to the potential of VR for treatment of public speaking and to the effects of safety seeking behavior on fear reduction.

Thomas More University of Applied Sciences

The expertise unit conducts applied, practice-oriented research in the field of psychology and technology. There is a strong focus on the interaction between both domains and the synergy they create, in particular within mental healthcare and human-technology interaction. More information can be found on www.digitalmentalhealth.be.

Research coordinator Psychology and technology, Research group People and Well-being, Centre of Expertise Care and Well-being (December 2016 – present)
Researcher - Lecturer Applied Psychology (October 2013 – November 2016)

- Conducting and managing research on the possibilities of technology for psychology and vice versa. Selection of projects:
 - o 2023 – 2025 interregnorthsea.eu/**SUPER**
User participation examples and recommendations in digital mental health: project partner of a 400k Interreg North Sea project, funded by ERDF & own cofinancing
 - o 2022 - 2024 immersivementalhealth.be
immersive technology with biofeedback for relaxation: project partner of a 443k TETRA trajectory funded by Flanders Innovation and Entrepreneurship & cofinancing by Flemish partners
 - o 2022-2024 @bc, familielink.be
Attachment-focused Online Support: Stimulating Youth Resilience using Online Prevention of Attachment Ruptures in Families
183k C3 project, funded by the KU Leuven IOF-council
 - o 2020 – 2022 m-path.io
evidence-based experience sampling for clinical practice: co-supervisor of a 499k C3 project, funded by the KU Leuven IOF-council

- 2020 – 2012 **onlinehulp-apps.be**
appstore voor wel-being and mental health: project partner of a 192k COOCK-project, funded by Flanders Innovation and Entrepreneurship.
- 2020 - 2021 **eHealth signpost**
policy recommendations concerning technological and digital applications in care of welfare: promotor of a 45k project, financed by the Policy Research Centre on Welfare, Health and Family.
- 2019 - 2021 **immersiveware.be**
immersive technologies for healthcare: project partner of a 476k TETRA trajectory funded by Flanders Innovation and Entrepreneurship & cofinancing by Flemish partners
- 2018 - 2020 **immersivetraining.be**
immersive technologies for training and education within organisations: project partner of a 471k TETRA trajectory funded by Flanders Innovation and Entrepreneurship & cofinancing by Flemish partners
- 2016 - 2022 nweurope.eu/eMEN
development and dissemination of e-mental health in mental healthcare: project partner of a 5.3M Interreg NWE project, funded by ERDF & own cofinancing
- 2015 - 2018 **carewear.be**
wearable technology in mental health care: project leader for 116k TETRA preparatory trajectory & 480k TETRA trajectory, funded by Flanders Innovation and Entrepreneurship & cofinancing by Flemish partners
- 2013 - 2015 **touch2learn.be**
mobile technology as a part of innovative teaching: research partner for education development fund study, funded by KU Leuven Association
- Human factor studies
 - Shaping the design of medication packaging designs, by developing and running experimental research designs, together with LiCalab. In the studies, which take place in an international setting, we rely on partners from other EU-countries like The UK, Denmark and Germany, partners from Asia and Oceania (Australia, China and Japan) and Latin and South-America (Brazil, Colombia and Mexico).

Policy Research Centre on Welfare, Health and Family, University of Leuven

The goal of this center is to support the minister of welfare, health and family issues in pursuing an effective, innovative, and inclusive policy, and to do this by means of research results and empirical data.

Researcher (September 2009 – September 2013)

- 2011 Kleur Je Leven: Evaluating the possibilities of using an e-mental health intervention in a home nursing organization to prevent and treat comorbid depression in chronically ill patients
- 2009 STAP: Setting up and evaluating implementation of a stress management course.

TEACHING EXPERIENCE

Thomas More University of Applied Sciences

Lecturer (2013 – present)

- Applied Psychology & Technology (B-TM-Y03463; 2013 – 2022)
 - The purpose of this course is threefold. First, to provide students with a better grasp of the existing technological possibilities for psychological diagnosis, research, counseling and behavior modification. Second, to outline how psychological knowledge can be used to ergonomically optimize the design and usability of new technology. Third, to critically consider the behavioral and ethical implications of using various technologies.
- Supervising students' bachelor dissertations in applied psychology
- Guest lectures
 - Bachelor courses on Health Psychology and Bachelor degree dissertation

KU Leuven

Guest lecturer (2015-2019)

- E-mental health module in the Trends in e-Psychology MOOC on edx.org

Teaching assistant (2012-2013)

- Master course: seminar psychology of prevention and health promotion
- Master course: Psychology and Applied Communication
- Supervising graduate students' master dissertations both in psychology and general medical practice

FREELANCE EXPERIENCE

The Human Link

The Human Link was founded in 2004 with the goal to encourage companies, organizations and individuals to be involved with their psychological well-being in a preventive way. The Human Link offers services to companies, organizations and individuals.

Freelancer (2014 – 2022)

- Supporting research projects
 - 2017 - 2019 **Patronus**
Personalized Anxiety Therapy thRough lOngitudinal & User-aware Services, on the potential of VR and wearables in the treatment of anxiety disorders: project partner of a 2.02M imec icon project (demand-driven, cooperative research) funded by imec and Flanders Innovation and Entrepreneurship
